Are you a Clear Sky subscriber? Click here to log More Gainesville, FL, Weather Information Weather Warning Doppler Radar Area Radar State Weather Conditions Satellite Intervals when the sun is no more than 6 degrees below the horizon at sunrise or sunset. The horizon needs to be clearly defined and the brightest stars should be seen in good atmospheric conditions (i.e. moonlight, or other light). It is still possible to carry out ordinary outdoor activities. The time when the sun is between 6 and 12 degrees below the horizon at sunrise or sunset. The horizon is well defined and the contours of objects are visible without artificial light. The usual outdoor activities are impossible at this time without additional light. The sun's time range is between 12 and 18 degrees below the horizon at sunrise or sunset. The sun does not contribute to the illuminating of the sky before this time in the morning, or after this time in the evening. At the beginning of the morning astronomical sunset and at the end of an astronomical sunset in the evening, the sky light is very faint, and may be 100% ambiguous. Civil sunset time minus sunrise people's time. The actual sunset time minus the actual Sunrise time. The change in the length of daylight between today and tomorrow is also listed when available. °C Hourly Weather for Gainesville for 7 Days to Ad Day Ads
